TWO VOLUMES PER YEAR.

THE AMERICAN GEOLOGIST,

The Oldest Exclusively Geological Magazine Published in America

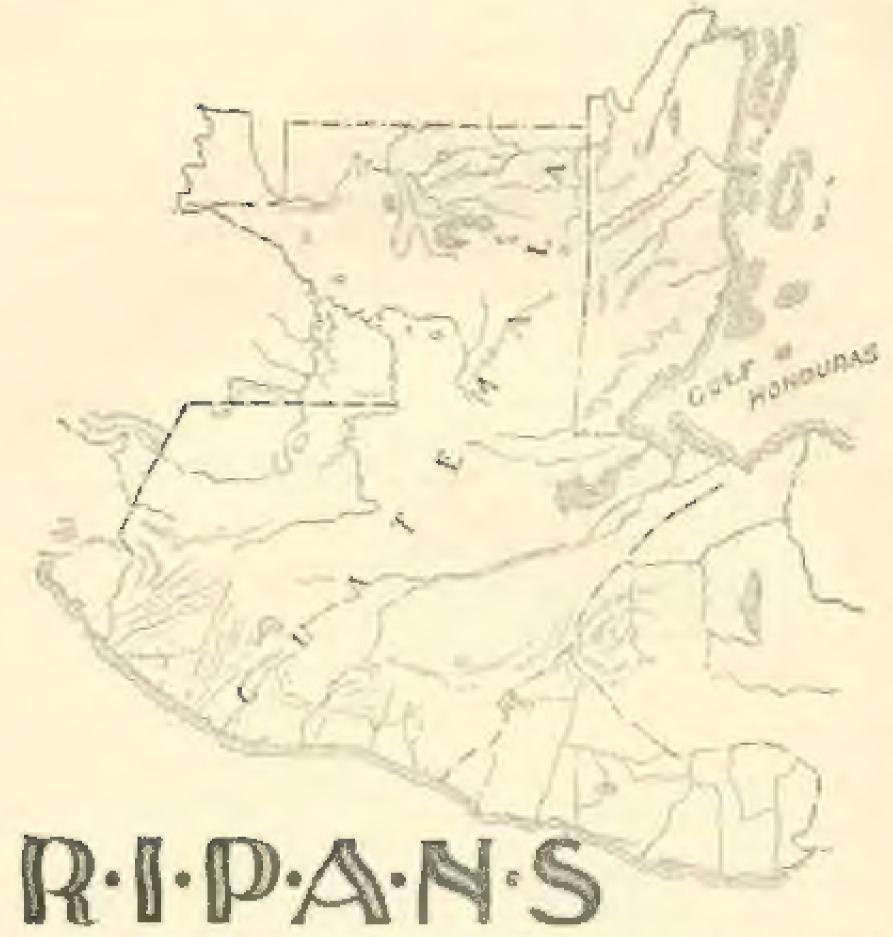

TERMS.

The AMERICAN GEOLOGIST is issued monthly from the orace of publication at Minne apolts, Minnesota, United States of America. Twenty five volumes are completed: the twenty-sixth began with the number for July, 1900. The magazine has received a cordial welcome and a generous support from leading acologists overs where said it is now recognized as the exponent of the rapid prological progress that is taking place on the continent of North America, including Canada, the United States and Mexico. North-lead are geologic phenomena subdited on a more expensive scale and nowhere also are results attained of greater economic and scientific importance.

The AMERICAN GEOLOGIST lays before its renders from month to month the latest results of geological work. In addition to the longer papers it gives synopees of recent geological publications and brief notes on current geological events.

AND IS A WONDERFULLY HAND-SOME VOLUME OF 205 PAGES, WITH 160 ILLUSTRATIONS. . . .

The paper used is FINE PLATE PAPER, and every typographical detail is artistic. It is a story of what four people saw on just such a trip as you would like to make.

OUR BOOK DEPARTMENT

The Life of the Master

By Rev. JOHN WATSON, D.D. ("Ian Maclaren")

The neither of "The Mind of the Masse" and "Issuin the Econic Sider Each "has written a story of the life of the Saviour which will embody all that is tobi in the sacred records, along with such supplients many information as has been pathered by medern scholarship. The work is written in 4 style of charming sincerty and directness. It will contain double the amount of material which is at present appearing in McClure's Magazine.

Life of Napoleon Bonaparte

By IDA M. TARBELL

This is a profincive illustrated work, proposed with the aim of omitting no insportant Supoleonic pictors. In the case of great paintings is separable to a complete pictorial life of Supoleon, of which stellings or engravings were not obtainable, photographs were specially prepared; and in consequence the work is singularly complete on its perceial side. Moreover, it contains one of the most sustable about inographics of Napoleon anywhere in existence.

eath Thousand. Revised Edition, stobly illustrated.

In Press.

The History of the South African War

By A. CONAN DOYLE

This is the first important literary fruit of Mr. Dorle's army experience to South Africa. The notion's patentialing mesheds in historical work are as well known to confere as his skill do a story teller, and his new history of the Boor War will for this reason possess narsonly merit.

La Prop.

The Life of Abraham Lincoln

By IDA M. TARBELL

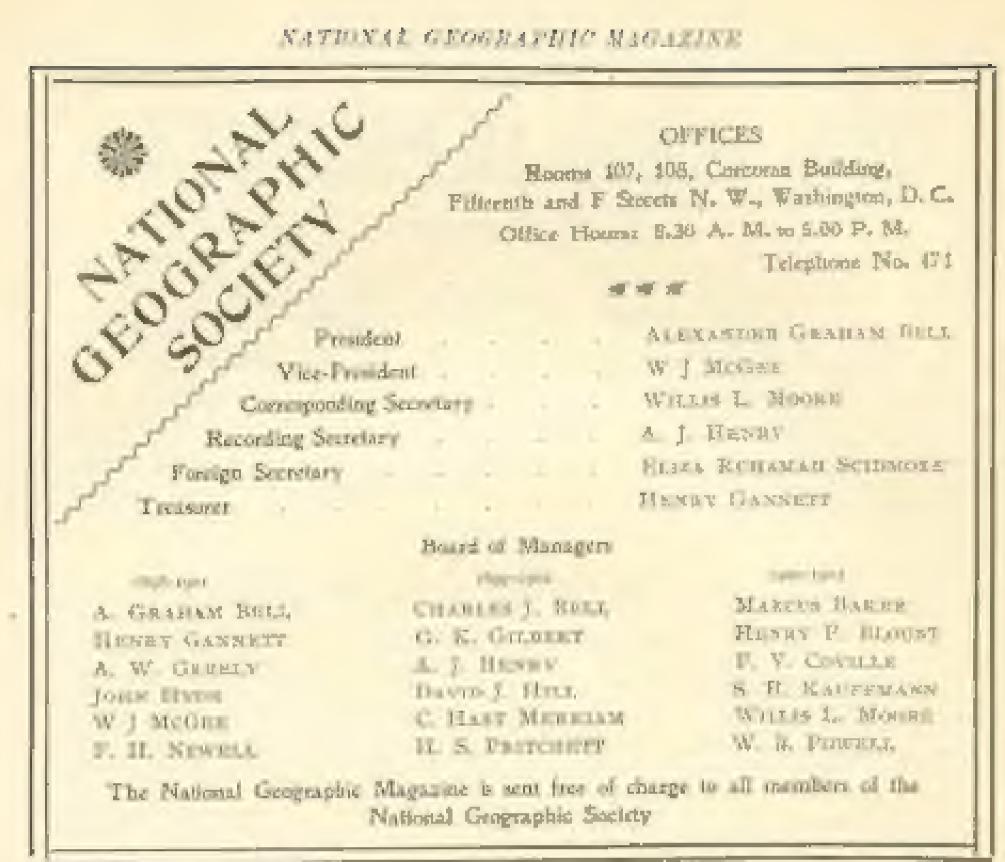

Drawn from original source, and containing more specific, letters and telegrams bibberts mountainly.

"A portrain that helps are to apple retard better than ever before the magnet of man Alexborn Lincoln was ... A sarrative that is so introduced in its revelations as this of the Turbell's helps us to seek with all his greatness. A rational Lincoln was east in the mold of agr common homeories. ... Her work presents a portrait of the man that no spadent of history can allered to miss, for it is very assent, so it does full justice to that homely side of Lincoln's character which has done more than are thing else to give him a been's place by the hearts of the common people. — Freedly Lincoln's Lincoln.

New Relition, with 22 full page illustrations. Index. 2 relation, New, 63-8 93. 85.00.

SOME SIGNIFICANT FACTS CONCERNING THE FOREIGN TRADE OF GREAT BRITAIN

Mr Michael G. Mulhall contributes to the Jone munior of the Review of Rereses for instructions an article on the subject of British trade, which presents some facts of far-reaching eigenficance with great clearness and force. The article is announcised by the author in ten paragraphs, which are substantially as follows:

- 3. The weight of the merchandise amountly imported into Great Econic loss multiplied fivefold in forty years, arounging at present more than one ton yearly for each inhabitant.
- Z. More then half of the food supply of the United Kingdom is deaven from other countries, at an annual cost of about 25 (\$21.31) per indubitant.
- 3. The ment price of imported find is now only \$12 lbs. \$50.85 per 100, buying faden 20 per cont in the last twenty years.
- st. Most of the imported food could be raised in England, but at much greater cost, to the detriment of the working classes.
- 5. The enusurement of fiber in the mills of trent Britain has doubled in thirty years, and excessle the augregate consumption in France and Germany
- 4. The importation of counts and interest has grown elevanish in thirty yours, and the expects of hardware manufactures have doubles in value.
- The measureption of manufactured goods imported from foreign countries has clean from 15a. (\$3.55) per (ababitant in 1850 to 41a. (\$9.08) in 1809.
- 3. The value of textile grows responsed is less than it was thirty years and, but the values but rises 70 per cent.
- 4. The fall of prices has been a gain in Great Relatin of at least \$50,000,000 \$5.45,525,000 per antique.
- to. The tendency of Eritish tracks points to a steady increase of food imports and of hardware exports.

The recont deedging of the Daiester has rendered the river toodgable by burges fat a distance of 70 miles from its mouth, time greatly facilitating the Odesea grain trade.

The magnitude of the Norwegian fishing indicates enture by better illustrated than by the fact that, although the meson of 1897 was one of the poorest on resord, the catch included 34,549,000 cod and 130,000 tons of because.
